

Silent+ MINI WHITE

CONDENSATE REMOVAL PUMP

Now even easier to install. A fitting template is part of the box, so simply cut off and use to mark screw holes on the wall.

Under the inner flap there is also a quick start guide. This shows the basic steps for installing the the World's quietest mini pump.

Easy to install. aspenpumps.com

an ASPEN PUMPS GROUP brand

Silent+ Mini Lime

The Silent+ Mini Lime pump is not only the best pump in its class, but also the quietest elbow pump for any air conditioning system.

- Maximum flow rate 12l/h
- Max. rec. head: 10m (flow rate 6l/h)
- 20 dB(A) at 1m
- Commercial

Part No. FP3322/3

Mini Aqua®

The World's thinnest condensate pump is designed to fit where no other pump can be installed.

- Maximum flow rate of 12l/h
- Max. rec. height: 10m (flow rate 6l/h)
- 21 dB(A) at 1m
- Residential

Part No. FP2406/2

Mini Orange®

The best-selling Mini Orange is a highly reliable pump with unrivalled performance.

- Maximum flow rate of 12l/h
- Max. rec. height: 10m (flow rate 6l/h)

Silent+ MINI WHITE

CONDENSATE REMOVAL PUMP

Today's users demand quiet condensate pumps, in offices or hotels, but equally in the home.

The **Silent+** range is designed on the basis of a "whole system approach" to ensure the quietest possible operation without compromising performance.

The **Silent+ Mini White** is the World's quietest mini pump so you can guarantee that it won't be heard.

Make sure you **install a good night's sleep!**

Incredibly quiet, easy to install and maintain, the **Silent+ Mini White** has been designed to fit either side of the evaporator unit. A double insulated reservoir eliminates condensation and is simple to unclip for cleaning and maintenance.

KEY FEATURES:

1 Easy installation

Position inlet left or right for installation flexibility.

2 Rotary diaphragm pump

Mitigates noise at higher flow rates Increased flow rates/head.

3 Flexible inlet

Suits various inlet pipe sizes and limits sound travel.

4 Capacitance technology

Pump matches inflow rate perfectly for quietest possible performance.

5 Thermally insulated reservoir (featuring 3 stage filtration process)

Simple clip/unclip single handed removal.

6 Adaptive level sensing

Discreetly self adapts to a thousand inflow water levels for optimum performance.

7 Optional easy-fit installation spacer

Enables power cables and pipework to be routed through AC unit knock out points.

8 Accessories

Comes with a range of accessories for easy install.
