

A2L/A2/A3 refrigerant use with Testo products

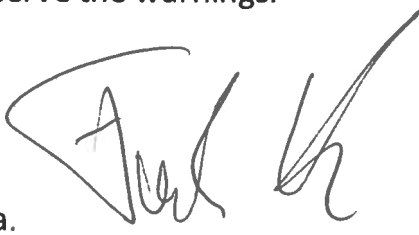

Titisee-Neustadt, 2023/07/23

Product: **testo 560i (scale only)**

Refrigerants classified as Class 2L or higher according to the ISO 817 standard (also known as "A2L/A2/A3 refrigerants") have a high flammability. Appropriate safety measures must be taken when handling these refrigerants.

The above-mentioned product has undergone a thorough internal safety assessment.

The Testo product can be used provided that the international and national laws, standards, guidelines and safety regulations for refrigeration systems as well as the regulations of the equipment manufacturers are observed. It is essential to follow the instructions of the operating manual for the product and observe the warnings.
